DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) In claim 1 (and all claims dependent thereon), the parameter n is undefined.

(b) In claim 1 (and all claims dependent thereon), the preamble states a process for preparing an *aromatic oligomer, cooligomer, polymer or copolymer*, yet required step b) specifies *isolating the resulting polymer*, and therefore the claim is indefinite in whether a *polymer* is actually required, or whether applicants are here using the word *polymer* to cover all four of *aromatic oligomer, cooligomer, polymer or copolymer*.

(c) In each of claims 6 and 8, structure (Id), parameters R_9 and R_{10} are undefined.

(d) In claim 9, the intended scope of "other components" cannot be determined.

(e) In claim 18, the phrasing "obtainable by", which is equivalent to "may be obtained by" renders the claimed scope indefinite because it cannot be determined whether other polymers, made by other unrecited methods, are also being claimed.

Art Unit: 1713

The claim should be amended to use "obtained by" to unambiguously require that the polymer is limited to those which result from the stated method.

Claim Rejections - 35 USC § 102 and/or 103

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 18 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sinta et al (US 6,107,425).

Claim 18 is set forth as product-by-process, and is interpreted according to MPEP 2113:

PRODUCT-BY-PROCESS CLAIMS ARE NOT LIMITED TO THE MANIPULATIONS OF THE RECITED STEPS, ONLY THE STRUCTURE IMPLIED BY THE STEPS.

"[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985)

Art Unit: 1713

ONCE A PRODUCT APPEARING TO BE SUBSTANTIALLY IDENTICAL IS FOUND AND A 35 U.S.C. 102 /103 REJECTION MADE, THE BURDEN SHIFTS TO THE APPLICANT TO SHOW AN UNOBVIOUS DIFFERENCE.

"The Patent Office bears a lesser burden of proof in making out a case of prima facie obviousness for product-by-process claims because of their peculiar nature" than when a product is claimed in the conventional fashion. In re Fessmann, 489 F.2d 742, 744, 180 USPQ 324, 326 (CCPA 1974). Once the examiner provides a rationale tending to show that the claimed product appears to be the same or similar to that of the prior art, although produced by a different process, the burden shifts to applicant to come forward with evidence establishing an unobvious difference between the claimed product and the prior art product. In re Marosi, 710 F.2d 798, 802, 218 USPQ 289, 292 (Fed. Cir. 1983).

The reference shows is Examples 1-5 the making of photoresists comprising the required monomer and polydispersity specified in the claims. As the polymer is otherwise devoid of specific structural features, the reference materials appear to be within the scope of the claims. If any differences exist, they would be minor and obvious. The burden of proof is shifted to applicants to show that the reference photoresists are outside the scope of the claims.
